

Driver Ticket Sale Device

Also for over-the-counter ticket sale

The FELA FSD6 driver ticket sale device, with the standardised S-POS C/CS-compatible interface, meets all modern requirements of a transport company. In addition to the compact, robust design, the ease of use offers the highest level of comfort for the bus driver: Ticket sale, driver terminal for the central control system as well as control device for passenger information systems. It is fitted with an RFID card reader for customer cards and driver registration; has optional barcode scanner and rapid printer with easy paper change. An external printer can be connected up for multiple-trip cards as well as for credit/debit card payment terminals.

Our driver ticket sale device is fitted with a GPS module and an antenna. The position of the vehicle can therefore be continuously determined in real time and documented. The use of modern touch technology ensures a long service life, combined with clearly arranged handling.

Together with the cash table, this provides a satisfying overall solution for the driver.

Driver ticket sale device

- Multicore CPU – more computing power
- LTE – the latest generation of mobile communications standard
- Capacitive touch display with gesture control
- Touch displays can be swivelled in all directions – optimal, individual adjustment possible
