

PIN Pad

Intuitive terminal with touch function

A cashless payment solution that works reliably even with high customer frequencies and long transit times: This is exactly what the FELA PIN Pad offers you. The customer-friendly all-rounder can be integrated into any checkout infrastructure or can be used independently of the cash register.

The FELA PIN Pad is a terminal that has been optimised for use in large companies. Its unique features include the particularly elegant design, the illuminated card readers that provide visual support for the card holder, backlit keys with tactile elements, a privacy screen integrated into the housing and a large colour display. Customer-specific applications and communication with the card holder are possible thanks to the colour display.

Together with the terminal's catchy look based on clean, sober lines, it creates a positive customer experience.

PIN Pad

- Touch display for heavier user operation
- Contactless, pay quickly
- Simple and intuitive operation
- Can be integrated into any cash register infrastructure
- Colour display with backlight
- Security standard PCI PTS 5.x

PIN Pad
