

# Ceiling Mounting 2x

## Shapely and light

The new FELA ceiling mounting of two TFTs was developed for use in rail vehicles in public transport. The designation "V-mounting" is also used for this ceiling mounting because the side view resembles a "V".

It is used to hold two TFT monitors with a front frame. Mounted on the ceiling in rail vehicles, it gives passengers an unobstructed view of the displayed passenger information from both sides:

- the current location
- the further course of the journey with a way station display
- the time of arrival
- connections if needed

## For 18.5 and 21.5 inches

- Aluminium frame, welded
- Powder coating with anti-graffiti properties
- Can be used flexibly with two mounting variants
- Easy assembly, installation and light weight
- Colour choice according to customer requirements (RAL, NCS)
- Customised solutions for simplified assembly in refit projects
- Renewal of existing vehicle

# Ceiling mounting 2x for 18.5 and 21.5 inches

## Technical specifications
