

# Wall Mounting single

## Shapely and light

The new FELA wall mounting of a TFT was developed for use in rail vehicles in public transport.

It is used to hold a TFT monitor of different sizes with a front frame. It is mounted in rail vehicles on vertical surfaces such as walls, partitions in the entry area and many more.

The mounting, together with the TFT monitor, allows passengers an unobstructed view of information about the further course of the journey:

- the current location
- the further course of the journey with a way station display
- the time of arrival
- connections if needed

## For 15 and 21.5 inches

- Aluminium frame, welded
- Powder coating with anti-graffiti properties
- Can be used flexibly
- Easy assembly, installation and light weight
- Colour choice according to customer requirements (RAL, NCS)
- Customised solutions for simplified assembly in refit projects
- Renewal in existing vehicles

# Wall mounting, single, for 15 and 21.5 inches
